Antibody to Mouse Interleukin-12 p40
RAT MONOCLONAL

Catalog Number: AB-511
Quantity: 500 micrograms
Format: Lyophilized
Host: Rat
Isotype: IgG2a
Clone: NYRmIL-12p40
Immunogen: r.Murine IL-12 p40

Background:

Active interleukin-12 (IL-12) is a p70 disulphide-linked dimer composed of p35 and p40 subunits. The protein is a pleiotropic cytokine produced primarily by antigen presenting cells and has multiple effects on T lymphocytes and natural killer cells in terms of stimulating cytotoxicity, proliferation, production of other cytokines and Th1 subset differentiation.

Specificity and Preparation:

Rat anti-mouse interleukin-12 p40 (IL-12 p40) is purified over an ion exchange column. Protein concentration is 1 mg/ml in PBS (after reconstitution).

Usage and Storage:

Reported to be effective for direct ELISA, immunoblotting, immunoprecipitation. Titer: by direct ELISA, 1:5,000 dilution will yield 0.5 O.D using alkaline phosphatase conjugated rabbit anti-mouse Ig (Jackson Laboratories).

Reconstitute with sterile H₂O. Gently spin down material before use; 5-10 seconds in a microfuge should be adequate. Store lyophilized material at 4°C in dry environment. After reconstitution, if not intended for use within a month, aliquot and store at -20°C. Material is stable for two years lyophilized, one month in solution at 4°C.
