**Anti-Conjugated Acetylcholine  
MOUSE MONOCLONAL**

**Catalog Number:** AB-T029  
**Quantity:** 50 microliters  
**Format:** Lyophilized and reconstituted with deionized water / 50% glycerol.  
**Host:** Mouse  
**Isotype:** IgG2a, Kappa  
**Clone:** HYChol001  
**Immunogen:** synthetic choline-glutaric acid conjugated to bovine serum albumin

**Specificity and Preparation:**

Monoclonal antibody to acetylcholine was obtained after AKRT mouse immunization with the conjugates: Choline-Glutaric acid-carrier proteins and hybridization of spleen cells with myeloma cell line SP2/O/Ag14. Ascites production was performed in irradiated BALB/c mice. The ascitic fluid was purified by ammonium sulfate precipitation.

This antibody targets conjugated choline-glutaric acid.

Using a conjugate choline-glutaric acid-BSA, antibody specificity was performed with an ELISA test by competition experiments with the following compounds:

<b>COMPOUND</b>	<b>CROSS REACTIVITY §</b>
Choline-GA-BSA	1
Choline-AA-BSA	1/500
Choline-SA-BSA	1/2,500
Farnesol-BSA	1/>50,000
Retinoic acid-BSA	1/>50,000
Myristic acid-BSA	1/>50,000
Acetylcholine	1/>50,000
Choline	1/>50,000

GA = Glutaric acid, AA = Adipic acid, SA = Succinic acid, BSA = Bovine Serum Albumin

§ Choline-GA-BSA concentration/unconjugated or conjugated compounds concentration at half displacement.

**Usage and Storage:**

Applications include ELISA (1/1,000-1/5,000); immunocytochemistry; immunohistochemistry (1/1,000-1/5,000, frozen); immunoblotting (western blot, 1/1,000-1/2,000). Store the antibody at 4°C for one month or -20°C in undiluted aliquots for up to one year. Avoid repeated freezing and thawing. Gently spin down material before use; 5-10 seconds in a microfuge should be adequate.

**Available Control(s):** Corresponding antigen.
