**Anti-Conjugated Homocysteine**  
RABBIT POLYCLONAL

**Catalog Number:** AB-T035  
**Quantity:** 50 microliters  
**Format:** Lyophilized and reconstituted with deionized water / 50% glycerol  
**Host:** Rabbit  
**Isotype:** IgG  
**Immunogen:** Synthetic conjugated Homocysteine to bovine serum albumin

**Specificity and Preparation:**

Antiserum previously preabsorbed on protein carriers and purified by ammonium sulfate precipitation. This antibody targets conjugated homocysteine. **This antibody does not recognize free homocysteine.** Using a conjugate Homocysteine-Glutaraldehyde-BSA, antibody specificity was performed with an ELISA test by competition experiments with the following compounds:

COMPOUND	CROSS REACTIVITY §
Homocysteine-G-BSA	1
Cysteine-G-BSA	1/423
Homocysteic acid-G-BSA	1/>100,000

G = Glutaraldehyde, BSA = Bovine Serum Albumin  
§ Homocysteine-G-BSA concentration/unconjugated or conjugated amino acids concentration at half displacement.

**Usage and Storage:**

Applications include ELISA (1/1,000-1/5,000). Fixation of tissue for use with these antibodies should be done with glutaraldehyde. The use of paraformaldehyde in conjunction with glutaraldehyde may improve staining results. Store the antibody at 4°C for one month or -20°C in undiluted aliquots for up to one year. Avoid repeated freezing and thawing. Gently spin down material before use; 5-10 seconds in a microfuge should be adequate.

**Available Control(s):** Homocysteine-G-BSA
