**Anti-Conjugated Acetyl Salicylic Acid
RAT POLYCLONAL**

Catalog Number: AB-T074
Quantity: 50 microliters
Format: Lyophilized and reconstituted with deionized water / 50% glycerol.
Host: Rat
Isotype: IgG
Immunogen: synthetic acetyl salicylic acid conjugated to bovine serum albumin

Specificity and Preparation:

Antiserum previously preabsorbed on protein carriers and purified by ammonium sulfate precipitation. This antibody targets conjugated acetyl salicylic acid.

Using a conjugate acetyl salicylic acid-BSA, antibody specificity was performed with an ELISA test by competition experiments with the following compounds:

COMPOUND	CROSS REACTIVITY §
Acetyl salicylic acid-BSA	1
Acetyl salicylic acid	1/>100,000
Tyrosine-G-BSA	1/>100,000
Tryptophan-G-BSA	1/>100,000

G = Glutaraldehyde, BSA = Bovine Serum Albumin

§ Acetyl salicylic acid-BSA concentration/unconjugated or conjugated concentration at half displacement.

Usage and Storage:

Applications include ELISA (1/2,000-1/5,000). Store the antibody at 4°C for one month or -20°C in undiluted aliquots for up to one year. Avoid repeated freezing and thawing. Gently spin down material before use; 5-10 seconds in a microfuge should be adequate.

Available Control(s): Corresponding antigen.
