**Anti-Conjugated Thioctic Acid
RAT POLYCLONAL**

Catalog Number: AB-T088
Quantity: 50 microliters
Format: Lyophilized and reconstituted with deionized water / 50% glycerol
Host: Rat
Isotype: IgG
Immunogen: Synthetic Thioctic Acid conjugated to bovine serum albumin

Specificity and Preparation:

Antiserum previously preabsorbed on protein carriers and purified by ammonium sulfate precipitation.

This antibody targets conjugated Thioctic Acid. **This antibody does not recognize free thioctic acid.**

Using a conjugate Thioctic acid-Protein Carrier (BSA), antibody specificity was performed with an ELISA test by competition experiments with the following compounds:

COMPOUND	CROSS REACTIVITY §
Thioctic acid-BSA	1
L-Cysteine-BSA	1/>50,000
Glutathion-BSA	1/>50,000

BSA = Bovine Serum Albumin

§ Thioctic acid-BSA concentration/conjugated close structure concentration at half displacement.

Usage and Storage:

Applications include ELISA (1/2,000-1/5,000). Store the antibody at 4°C for one month or -20°C in undiluted aliquots for up to one year. Avoid repeated freezing and thawing. Gently spin down material before use; 5-10 seconds in a microfuge should be adequate.

Available Control(s): Thioctic Acid-BSA
