**Anti-Conjugated Formaldehyde
RAT POLYCLONAL**

Catalog Number: AB-T092
Quantity: 50 microliters
Format: Lyophilized and reconstituted with deionized water / 50% glycerol
Host: Rat
Isotype: IgG
Immunogen: Synthetic formaldehyde conjugated to bovine serum albumin

Specificity and Preparation:

Antiserum previously preabsorbed on protein carriers and purified by ammonium sulfate precipitation.
This antibody targets conjugated formaldehyde.

Using a conjugate Formaldehyde-BSA, antibody specificity was performed with an ELISA test by competition experiments with the following compounds:

COMPOUND	CROSS REACTIVITY §
Formaldehyde-BSA	1
Glutaraldehyde-BSA	1/30,000
Malondialdehyde-BSA	1/>50,000
Glyoxal-BSA	1/>50,000

BSA = Bovine Serum Albumin

§ Formaldehyde-BSA concentration/unconjugated or conjugated analogs concentration at half displacement.

Usage and Storage:

Applications include ELISA (1/2,000-1/5,000) and immunohistochemistry / immunocytochemistry (frozen sections; 1/500-1/1,000). Store the antibody at 4°C for one month or -20°C in undiluted aliquots for up to one year. Avoid repeated freezing and thawing. Gently spin down material before use; 5-10 seconds in a microfuge should be adequate.

Available Control(s): Formaldehyde-BSA
