**Anti-Conjugated Azelaic Acid
RABBIT POLYCLONAL**

Catalog Number: AB-T093
Quantity: 50 microliters
Format: Lyophilized and reconstituted with deionized water / 50% glycerol
Host: Rabbit
Isotype: IgG
Immunogen: Synthetic azelaic acid conjugated to bovine serum albumin

Specificity and Preparation:

Antiserum previously preabsorbed on protein carriers and purified by ammonium sulfate precipitation.

This antibody targets conjugated azelaic acid. **This antibody does not recognize free azelaic acid.**

Using a conjugate azelaic acid-BSA, antibody specificity was performed with an ELISA test by competition experiments with the following compounds:

COMPOUND	CROSS REACTIVITY §
Azelaic acid-BSA	1
Adipic acid-BSA	1/7,000
Oleic acid-BSA	1/>50,000

BSA = Bovine Serum Albumin

§ Azelaic acid-BSA concentration/unconjugated or conjugated analogs concentration at half displacement.

Usage and Storage:

Applications include ELISA (1/1,000-1/5,000) and immunohistochemistry / immunocytochemistry (frozen sections; 1/500-1/1,000). Store the antibody at 4°C for one month or -20°C in undiluted aliquots for up to one year. Avoid repeated freezing and thawing. Gently spin down material before use; 5-10 seconds in a microfuge should be adequate.

Available Control(s): Azelaic Acid-BSA
