**Anti-Conjugated D-Biotin
RABBIT POLYCLONAL**

Catalog Number: AB-T146
Quantity: 50 microliters
Format: Lyophilized and reconstituted with deionized water / 50% glycerol
Host: Rabbit
Isotype: IgG
Immunogen: Synthetic D-Biotin conjugated to bovine serum albumin

Specificity and Preparation:

Antiserum previously preabsorbed on protein carriers and purified by ammonium sulfate precipitation.

This antibody targets conjugated D-Biotin (vitamin H). **This antibody does not recognize free D-biotin.**

Using a conjugate D-Biotin-Protein Carrier (BSA), antibody specificity was performed with an ELISA test by competition experiments with the following compounds:

COMPOUND	CROSS REACTIVITY §
D-Biotin-BSA	1
D-Panthenic acid-BSA	1/>50,000
Reduced Thiocctic acid-BSA	1/>50,000

BSA = Bovine Serum Albumin

§ D-Biotin-BSA concentration/conjugated close-related compounds concentration at half displacement.

Usage and Storage:

Applications include ELISA (1/2,000-1/5,000) and immunohistochemistry / immunocytochemistry (1/500 -1/1,000). Store the antibody at 4°C for one month or -20°C in undiluted aliquots for up to one year. Avoid repeated freezing and thawing. Gently spin down material before use; 5-10 seconds in a microfuge should be adequate.

Available Control(s): D-Biotin-BSA
