

Antibody to Myc-tag
MOUSE MONOCLONAL

Catalog Number: AB-226
Quantity: 100 micrograms
Format: PBS, pH 7.4 with 0.05% sodium azide. Frozen liquid.
Host: Mouse
Isotype: IgG1
Clone: Myc.A7
Immunogen: a synthetic peptide corresponding to residues 410-419 (EQKLISEEDL) coupled to KLH

Specificity & Preparation: Recognizes proteins containing the Myc epitope tag fused to either amino- or carboxy-termini of targeted proteins in transfected mammalian cells. The concentration is 1 mg/ml.

Usage: Reported to be effective for immunoblotting (western blot, 1:1000), immunoprecipitation and immunostaining (1:200).

Storage: Store the antibody at 4°C for three months or -20°C in undiluted aliquots for up to one year. Avoid repeated freezing and thawing. Gently spin down material 5-10 seconds in a microfuge before use.
