

**Antibody to GAPDH
MOUSE MONOCLONAL**

Catalog Number: AB-267
Quantity: 100 micrograms
Format: 10 mM PBS, pH 7.2 with 0.1% NaN₃
Host: Mouse
Isotype: IgG1
Clone: GAPDH, H8
Immunogen: Recombinant GAPDH

Specificity and Preparation:

Recognizes native and denatured forms of GAPDH from human, mouse, rat and rabbit. Recombinant GAPDH produced in bacteria (BL-21), insect cells (SF9), and yeast (*Saccharomyces cerevisiae*) is also recognized. GAPDH from other species may also be detectable. The concentration is 1 mg/ml.

Usage and Storage:

Reported to be effective for ELISA and immunoblotting (dot blot and western blot with ECL 1:1000-10000 dilution, incubation for one hour at room temperature). For each application, the reagent should be titrated to obtain optimal results.
Store the antibody at 4°C (add 0.1% NaN₃) for three months or -20°C in undiluted aliquots for up to one year. Avoid repeated freezing and thawing. Gently spin down material before use; 5-10 seconds in a microfuge should be adequate.
