

**Rabbit IgM (mu) Goat Polyclonal**  
ATS-SELECT SECONDARY ANTIBODY

**Catalog Number:** AS-052  
**Quantity:** 2 milliliters  
**Format:** Antiserum, Lyophilized  
**Host:** Goat  
**Immunogen:** Rabbit IgM mu heavy chain

**Background:** Anti-Rabbit IgM antibody generated in goat specifically detects rabbit IgM mu heavy chain. Immunoglobulin M is the largest antibody isotype and the first to be secreted against an initial exposure to antigen. IgM is predominantly produced in the spleen. Formed from covalently linking 5 immunoglobulins together, the approximate molecular weight of IgM is 900kDa and possesses 10 binding sites (though due to the size of most antigens, not all sites are capable of binding at once). Due to this large size, IgM is typically isolated to the serum. Anti-Rabbit IgM antibody is ideal for investigators in Immunology, Microbiology, and Cell Biology.

**Specificity & Preparation:** This product was prepared from monospecific antiserum by a delipidation and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against Rabbit IgM and Rabbit Serum. No reaction was observed against Rabbit IgG.

**Usage:** Anti-Rabbit IgM antibody is suitable for use in ELISA, immunohistochemistry, and western blot. Specific conditions for reactivity should be optimized by the end user.

ELISA 1:20,000 - 1:100,000

Immunohistochemistry 1:1,000 - 1:5,000

Western Blot 1:2,000 - 1:10,000

Working dilutions must be determined by end user.

**Storage:** Restore with deionized water (or equivalent), 2.0 mL. Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use. Expiration date is one (1) year from date of receipt.
