

Rabbit IgG Fc Donkey Polyclonal
ATS-SELECT SECONDARY ANTIBODY

Catalog Number: AS-277
Quantity: 2 milligrams
Format: IgG, Liquid (sterile filtered)
Host: Donkey
Immunogen: Rabbit IgG F(c) fragment

Background: Anti-Rabbit IgG F(c) generated in donkey is a proteolytic fragment of immunoglobulin G (IgG) obtained by limited digestion with the enzyme papain under controlled conditions of temperature, time and pH. Receptors bind the Fc portion of rabbit IgG and often this fragment is removed from immunoglobulins to minimize receptor binding and lower background reactivity.

Specificity & Preparation: This product was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Donkey Serum, Rabbit IgG, Rabbit IgG F(c) and Rabbit Serum. No reaction was observed against Rabbit IgG F(ab).

Usage: Anti-Rabbit IgG F(c) antibody is tested by western blot and suitable for ELISA and immunohistochemistry, as well as other assays requiring lot-to-lot consistency.

ELISA 1:100,000

Immunohistochemistry 1:1,000 - 1:5,000

Western Blot 1:2,000 - 1:20,000

Working dilutions must be determined by end user.

Storage: Store vial at 4° C prior to opening. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Expiration date is one (1) year from date of receipt.
